## DETAILED ACTION

### *Prosecution History*

Claims **1-28** have been cancelled by way of the current amendment.

Claims **29-40** have been newly added by way of the current amendment.

Claims **29-40** remain pending and are allowed for at least the reasons below.

### *Allowable Subject Matter*

1. Claims **29-40** are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Abrams et al., Pub. No. US2002/0166117 A1 and Steele et al., Pub. No. US2004/0174823 A1.

Abrams discloses a method and system for providing pay-per-use distributed computing resources. The users are charged fees based on the amount of resources utilized to satisfy the needs of the application. The on-demand application processing system is further able to put a cap or limit on how much response time is built into the server side of application processing.

Steele teaches a method and system for designating and implementing support level agreements. There are three levels of service level agreements. Each SLA has an agreed upon response time.

As per **Claim 29, 33 and 39**, the closest prior art of record taken either individually or in combination with other prior art of record fails to teach or suggest a method comprising: in response to completing the request in less than the maximum acceptable time to complete the request defined by the completion time criterion, delaying returning the results to the requesting

entity for a period of time; after a lapse of the period of time, returning the results to the requesting entity.

Claims **30-32** depending from claim **29**, claims **34-38** depend from claim **33**, and claim **40** depends from claim **39** and are therefore allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
